The resources available through this network and the skills that students will develop in using it are of significant value in the learning process and student success in the future. These new opportunities also pose many new challenges including, but not limited to, access for all students, age-level appropriateness of material, conservation of resources, security/privacy/confidentiality, and cost of

maintaining the system. The district will endeavor to ensure that these concerns are appropriately addressed, but cannot insure that problems will not arise. By connecting to this network, the School Board intends only to provide a means for educational activities and does not intend to create a first amendment forum for free expression purposes. The district dedicates the property comprising the network, and grants access to it by users, only for the educational activities authorized under this policy and procedures and under the specific limitations contained therein.
